Professional Summary

Senior Business Analyst with 5+ years of experience leading product ownership, consulting, and delivery across India's Digital Public Infrastructure ecosystems—Account Aggregator (AA), ABDM, and ONDC—and broader digital transformation engagements across geographies. Strong track record in certification/compliance toolkits (SaaS), DPI-aligned solution design, and country-scale platform rollouts. Experienced in pre-sales as a lead presenter and solution owner, contributing to \$1M+ in project wins. Also drives AI-enabled automation for operations/BPO workflows (insurance claims and logistics tracking support), delivering ~40% cost reduction through workflow redesign and AI-assisted execution. Strong analytics and reporting foundation (SQL, Python, Power BI/Tableau), with a finance/process background and deep stakeholder management across ecosystem bodies, industry collectives, and enterprise client teams.

Key Competencies

- **DPI / Open Networks:** AA, ABDM, ONDC ecosystems; compliance, onboarding, implementation readiness
- **Product Ownership (SaaS):** roadmap, prioritization, stakeholder alignment, delivery governance, continuous improvement
- **Business Analysis:** discovery, current-state mapping, gap analysis, BRD/PRD, user stories, acceptance criteria, UAT support
- **Consulting & Pre-sales:** pitch decks, proposals, SoW, solution narrative; lead presentation and deal shaping
- **AI-enabled Operations Automation:** claims operations and logistics support workflow automation; change management for adoption
- **Analytics & Reporting:** SQL, Python, DAX, Power BI, Tableau, Google Data Studio; operational and financial metrics
- **Delivery Management:** Agile/Scrum, Jira, Confluence; sprint governance, traceability, documentation

- **Communication:** English, Hindi, Marathi
-

Professional Experience

Senior Business Analyst / Product Owner — Suma Soft Pvt. Ltd.

Feb 2020 – Present | Pune, India

DPI / Ecosystem Certification & Compliance (AA, ABDM, ONDC)

- Led development of **automated certification toolkits** for AA, ABDM, and ONDC as an officially empaneled certifier, enabling repeatable, structured validations for ecosystem compliance.
- Engaged with **200+ ecosystem participants/clients**, building deep insight into their use cases, operating processes, and technical implementations during certification cycles.
- Supported market outcomes (as stated): **~70% share** for AA certifications and **~50% share** for ABDM certifications; among the **only two certifiers onboarded** for ONDC.
- Worked closely with stakeholders across Sahamati, National Health Authority, and ONDC, aligning expectations on certification approach, integration requirements, and ecosystem operating considerations.

End-to-End Product Ownership (Certification Toolkit SaaS Vertical)

- Owned the **certification toolkit product end-to-end** as Product Owner: product strategy, roadmap planning, prioritization, stakeholder management, delivery governance, and continuous improvement.
- Managed outcomes for the certification SaaS vertical by ensuring product readiness, operational usability, and alignment with evolving ecosystem expectations.

Global DPI Representation, Pre-sales, and Deal Conversion

- Represented the organization at Global DPI Summit engagements (2024–2025) across international venues including Cairo and Cape Town.
- Acted as **lead presenter and solution owner**, shaping solution narratives and converting strategic discussions into **>\$1M in project wins** (combined).

DPI Consulting & Digital Transformation (Multi-Geo)

- Led discovery workshops, **current-state mapping**, and **gap analysis** across geographies to design target-state solutions grounded in DPI principles or broader digital transformation needs.
- Supported logistics platform solution design and delivery across Zambia and Indonesia.

Country-Scale Logistics Platform Delivery

- Coordinated and supported delivery of a **country-wide rollout** logistics platform including:
 - **Buyer module**, **Seller module**, and **Operator module**
 - **Admin controls** and operational dashboards
 - **Analytics** capabilities for performance tracking and decision support
 - **Security** controls aligned to enterprise delivery expectations

AI-enabled Automation for BPO Operations (Insurance Claims + Logistics Support)

- Led AI-enabled automation initiatives for internal BPO workflows including **insurance claims processing** and **logistics tracking/support operations**.
- Delivered approximately **40% cost reduction** through workflow redesign, standardization, reduction of manual effort/rework, and effective use of AI tools for execution support.

Delivery Governance, Documentation, and Execution (Agile)

- Comfortable operating in **Agile** delivery models; used **Jira** and **Confluence** to manage epics/stories, sprint execution, delivery traceability, and project documentation.
- Produced high-quality consulting and delivery artifacts: **pitch decks**, **proposals**, **statements of work (SoW)**, and **business requirement documents (BRD)** for new projects and clients.

Analytics, Reporting, and Internal Performance Tracking (Multiple Projects)

- Built and automated reporting to track financial and operational performance and identify process improvements.
- Integrated data from diverse sources into consolidated reporting environments for live dashboards and leadership visibility.
- Wrote **SQL**, **DAX**, and **Python** scripts to extract, transform, and analyze metrics; applied statistical methods as needed for insight generation.

- Authored internal documentation including product architecture mapping and technical documentation for Python and AngularJS codebases.

Internal AI Thought Leadership & Change Enablement

- Curated and authored the monthly internal AI newsletter “**AI Pulse**” for the past **6 months**, translating fast-moving AI developments into practical internal adoption guidance.
- Led and coordinated the internal push for AI-enabled development by supporting teams through enablement, addressing adoption frictions, and resolving change-management issues.

Education

- **MBA (Executive)** — SP Jain School of Global Management, Australia | **2025**
Relevant coursework: Project Management, Operations Management, Leading Teams & Organizations, Blue Ocean Strategy, Big Data Analysis, Cloud Computing
- **Fundamentals of Data Science using Python** — Center for Artificial Intelligence & Analytics (CAIA), Pune | **2019**
- **CFA Level I Passed** — CFA Institute | **2018**
- **M.Com** — Brihan Maharashtra College of Commerce, Pune University | **2015**
(First Class)
- **SSC** — Maharashtra State Board | **2010** (96%)

Early Career Experience

Chartered Accountancy Internship — Chandorkar & Limaye, Chartered Accountants

2015 – 2018

- Gained grounding in business models, costing structures, profit centers, and operational realities across domains through audit-led exposure.
- Built capability in identifying patterns/anomalies in large datasets and reconciling operational vs financial interpretations.

Skills & Tools

Analytics & Reporting

- **Excel (advanced), SQL, Python, Power BI, Tableau, Google Data Studio**
- DAX, statistical analysis, KPI design, operational & financial dashboards

Product / BA / Delivery

- Product ownership (SaaS), roadmap prioritization, stakeholder alignment
- Discovery workshops, process mapping, gap analysis, BRD/PRD
- User stories, acceptance criteria, UAT coordination
- **Agile delivery, Jira, Confluence**

Documentation & Modelling

- Technical documentation, architecture mapping
- Flowcharts, sequence diagrams, structured process specifications

Domain & Business

- DPI/open networks: AA, ABDM, ONDC
- Financial statement understanding, accounting/ERP process understanding

Languages

- English, Hindi, Marathi
